Carbon Lions Club Gala Ice Carnival Friday, February 11

The Carbon Lions Club gala ice Carnival, scheduled to take place next Friday evening, February 11, promises an evening of excellent entertainment for both young and old alike. Prizes are being given for the best dressed entries in several age groups from 6 years of age and over to 19 years and over, and awards will be made in the same age groups for the best comic costume. Racing events for all ages up to 18 will be held at 8:45 and 9:30 p.m. Mrs. Schmalz of Belsker will also be on hand during the evening to present a skating exhibition with her troupe of fancy skaters.

The hog calling contest for farmers only should prove one of the best features on the program and many a "hugh" will be heard from the crowd while the event is in progress. Clown acts will also help to keep the crowd in a fun-loving mood.

Crowning of the winning competitor in the Carnival Queen contest will be held at 10:00 p.m., and immediately following the coronation the Queen will draw for the big door prize. The Queen contest has been keenly contested and the four girls competing in the event have been piling up a record number of votes in the last three weeks. The four girls, Ione Coates, Rose Dresser, Shirley Saunders and Phyllis Schuler have gone all-out in an attempt to capture the honor of being Queen, and with their staunch supporters, have been canvassing the district thoroughly.

A public address system, supplied through the courtesy of the Carbon Auto Service, will be in use during the evening, and those who might feel the pangs of hunger will be able to satisfy their craving at the refreshment booth serving hot dogs, coffee and soft drinks.

Proceeds from the carnival will be used for maintenance of the skating rink and other community activities.

Rose Dresser
Carnival Queen Contestant

CARBON HIGH SCHOOL CURLING TEAM PLAYS IN CALGARY

After defeating Acme in a replay of the regional playoff as the result of a tie, the Carbon High School curling team journeyed to Calgary on Friday, January 28, to take part in the southern Alberta playoffs. Carbon played Carlsbad at 9 a.m. and emerged victors over that aggregation 12-9. Following first games a luncheon put on by Taylor Pearson and Carson, who are sponsoring the playoffs, was held in the dining room of the Renfrew Club in Calgary. All participating junior rinks were in attendance, as also were a number of distinguished guests from the Royal Canadian Curling Club, and reporters from The Herald, radio stations CFAC and CFCN.

Play was resumed at the Calgary Curling Club, where Carbon was drawn against Empress. Carbon lost this game by a score of 12-7. Curling against Blackie in the next round robin game both teams turned in what was probably some of the best curling seen during the playoffs. In six ends the game was tied on three occasions. Carbon went ahead in the seventh and eighth but Blackie came back in ninth to come within one point of Carbon. On the last end Blackie tied the score on a very close rock and in the eleventh counted another to win the game 11-10. Blackie went on to win the southern Alberta title.

Carnival Queen Contestant

A.Y.P.A. ELECTS OFFICERS

At the regular meeting of the A.Y.P.A., held at the vicarage on Friday, January 18, the following slate of officers was elected for 1949:

President, Mrs. Frank Emery.
Secretary, Mrs. Norman Nash.
Treasurer, Mrs. Gordon Hunt.
Plans were made for a skating party to be held on February 2.

Shirley Saunders
Carnival Queen Contestant

CARD OF THANKS

I wish to take this opportunity to thank the Carbon Old Timers for their lovely floral tributes, and also other friends who sent flowers and cards during my recent stay in hospital.

MRS. ALEX SHAW

AUSTRALIAN WOOL HIGH LAST YEAR

Canada paid more dollars for Australian wool in 1947-48 than in the previous year although shipments were smaller in volume. Canada bought 69,308 bales worth approximately \$11,985,000 as compared with 86,327 bales costing \$10,100,000 in 1946-47. The United Kingdom was the largest buyer of Australian wool, importing 1,270,000 bales during the past year.

Phyllis Schuler
Carnival Queen Contestant

For taking part in the playoffs members of the Carbon rink will like to thank Mr. B.J. Garrett for providing the transportation to Calgary and for his moral support while the games were in progress.

LEGION NOTES

The next regular meeting of the Carbon Legion will be held on Monday, February 21. This is an important meeting, so please give your support by attending. The Legion will have news of a great event in these columns in the near future. Watch for the announcement.

The next card party will be held on Wednesday, February 23.

A wedding of interest to many Carbon residents took place in Halifax on Saturday, January 22, when Lieut. D. Douglas Ross, son of Mr. and Mrs. R.A. Ross, was married to Shirley Lois, daughter of Mr. and Mrs. A. McIntosh of Halifax, N.S.

CARBON, THREE HILLS TIE IN FINAL LEAGUE GAME

The Carbon junior hockey team travelled to Three Hills on Wednesday, January 26, for the final league game scheduled before the playoffs begin. The first period ended in a 1-1 tie and although play roughened up in the second period no more tallies were made by either team and the final score was 1-1.

Carbon lineup—Goal, H. Hunt; defence, D. McLeod, D. Poxon, T. Heath, B. Hay; forwards, D. Patterson, G. McLeod, C. White, Foster, A. Martin, B. Heath, W. Martin, R. Kary.

Surveying The North

FRONTIERS HAVE ALWAYS BEEN A CHALLENGE to the people of this country, and much of the early history of Canada concerns the opening up of new areas to the West until the land was settled from coast to coast. For many years past the unknown areas have been to the north rather than to the west, and there has been a movement of population in that direction to settle farm land and conduct suitable for mining, fishing and lumbering which lies north of the trans-continental railway lines and the larger centres of population. The uninhabited areas of the Canadian north have always held great interest for many people, both because of the possibilities of finding wealth there, and because of interest in exploring the nature of that little-known part of the dominion.

Much Learned In Short Time

Most of those people who have become familiar with the Canadian north are enthusiastic about the possibilities of developing its natural resources and about its climate. Now, recent scientific advances are helping to add a great deal to our knowledge of that part of the country. Aerial photography has been introduced as a means of surveying the north, and in this manner much has been learned in a relatively short time regarding the geography of areas which have not yet been explored in the regular manner. Col. J. T. Wilson, a professor of geology at the University of Toronto recently told a gathering of Canadian defence scientists that the Royal Canadian Air Force has covered nearly one million miles of Canada's northland in the past year, and has gathered information regarding that part of the country which is of interest both for civilian purposes and for defence should that ever be necessary.

May Prove A Great Asset

Col. Wilson drew attention to the fact that a mountain range with heights which rival those of the Rocky Mountains has been found some 2,300 miles north of Ottawa, and that an island has been discovered in the Arctic which is larger than Canada's smallest province. He also pointed out that in Hudson's Bay there is an area larger than the British Isles about which very little is at present known. In addition to the survey of new land, the R.C.A.F. has been able to provide scientists with a great deal of information regarding the pre-Cambrian shield, that large tract of land bordering on Hudson's Bay which is rich in minerals and of great interest to students of geology. While exploration from the air does not supply all the detail which is gathered in a land survey, it is estimated that by the use of air photography a geographical survey of the entire north could be made in three to five years. While the same survey by land would take 200 years. Knowledge of the nature of the land in the north is essential if that part of the country is ever to be opened up, and information gathered in the aerial survey is of great value in future plans for development in the far northern areas.

Canada's Coal Production Up

OTTAWA.—Canadian miners dug more coal in 1948 than in any year since the 1914 output record of 1912.

The bureau of statistics said 1948 coal production in Canada totalled 18,277,000 tons against 15,869,000 in 1947 and 15,683,000 in 1942.

Alberta produced 8,074,000 tons against 8,070,000. British Columbia and the Yukon 1,772,000. Ontario 7,641,000 and Saskatchewan 1,586,000 against 1,571,000.

Exports in 1948 came to 21,650,000 tons compared with 20,564,000 in 1947.

INCOME TAX FOR ALASKA

JUNEAU, Alaska.—An income tax bill, expected to produce an annual revenue of \$2,500,000 was adopted by the Territorial House by a vote of 24 to 0.

The bill calls for an income tax payment amounting to 10 per cent of the total paid in federal income taxes.

One large mail order house uses up over 200 cartons of ink in one year.

RHEUMATIC PAINS, STIFFNESS

CHINESE VICE-CONSUL WEDS. CLANSMATE.—Follow students at a Yunnan university when they met Ernu Su and Chung Chu Chow. The latter Chinese vice-consul in Winnipeg, were married recently in the United Church, Winnipeg. Ernu Su is a white Chinese woman but her husband is a Chinese. The groom came to Canada 19 months ago with Ernu following last October.—S.N.S. photo.

FUNNY And OTHERWISE

A man dropped his wig in the street and a boy picked it up and handed it to him. "Thanks, my boy," said the owner of the wig. "You are the first genuine hair restorer I have seen."

Friend: "What's in that parcel?" Car: "Sure and its plums for the King."

"Pums? Why plums?" "Because it says in the National Anti-Suffrage League 'Victories'."

The prodigal son had returned. "Father," he inquired, "are you going to kill me for having left?" "No," answered the old man, looking the youth over carefully. "But let you live. But you put you to work and train a lot of that off."

"Boss, you must really take care of the children, or I shall have to disown you. Here you have gone and let poor little Arthur live his tongue up!"

Stop up if you've heard the story of the airman who had to take to his parachute while he was flying at a height of about 2,000 feet. "You see anything of a gas stove going up?"

"Hoy," he yelled. "See anything of a Spitfire going down?"

"Nope," replied the little old lady. "You see anything of a gas stove going up?"

Somewhere in Virginia there is a sign advertising damaged puppies. It reads: "Get a long little dog."

The doctor told the film actress that she was run down and needed a change.

"A change," said she. "Do you know that during the last 18 months I've had three husbands, four cars, three jewel robberies, 11 cooks, two divorces and seven land-lords? What other change can you suggest?"

Juggins: How do you get on with the boss, old man?

Juggins: He does about the meanest I know.

Juggins: How's that?

Juggins: He's had the legs sawn off the wheelbarrow so I can't sit down and rest.

DOES YOUR BACK ACHE?

Sitting in a dot—working in a damp place—drift—there are dozens of things which cause a backache! But there's one way thousands of Canadians have found relief—this condition—Dr. Chase's Kidney-Liver Pills. This effective remedy tones up both the kidneys and the liver—and brings welcome relief from pain in the small of the back caused by kidney weakness.

Annual Meeting of Shareholders The Royal Bank of Canada

Sydney G. Dobson, President, declares private enterprise the very basis of Canada's progress and freedom—Right to take risks and reap rewards the major motivating force in country's development—"Socialism and communism are not systems of freedom, but of rationed democracy, in which liberty is doled out like social security benefits."

James Muir, Vice-President and General Manager, reports new high records in field of Canadian banking—Royal Bank assets exceed \$2,222,000,000—Deposits reach new Canadian record of \$2,067,488,000—Profits moderately higher—\$4,000,000 added to Reserve Fund.

The threat to personal freedom inherent in the Socialist and Communist philosophies, and the high promise of Canada's future were stressed at the Annual Meeting of the Shareholders of The Royal Bank of Canada.

"On the evidence before me today, capitalism works," said Sydney G. Dobson, President. "It is the best system for the workers in these North American democracies are better fed, better housed and better supplied with the comforts of life than the vast mass of the population of collectivist countries. And they enjoy freedom."

"Our successful development, natural resources confirm our belief in private enterprise as the most motivating force in an economic system. All the natural resources imaginable are useless until they are brought out by the man who has the vision, the initiative, the energy, the courage, the most successful finder, and the most successful developer of private enterprise."

"The system that system people think hard and work hard because there are rewards for them. The incentives is recognized in every step of the way. It is the system whether they shall work or not work and how hard they shall work."

Berlin Air Lift Huge Operation

BERLIN.—As the Anglo-American air lift now more than six months old goes on into 1949, the predominant thought here is "how much longer will it go on?"

Since its birth June 26, 1948, when a handful of aircraft began to bring in food and fuel for 2,500,000 west sector Berliners, the air lift has grown into one of the greatest aerial supply operations in history.

In the teeth of those who said it could not be done, a combined British and American air armada has in the last half year flown in 700,172 tons of supplies in 96,490 flights.

It has meant:

1. Giving wings to more than 70,000 European-type freight cars each capable of storing 10 tons.

2. Flying 600 pounds of food, fuel and other supplies for every resident in the western sectors.

3. Flying in raw materials to keep the industries of Germany's largest city from closing down and giving renewed hope and faith to 2,500,000 human beings.

Seventeen Americans and nine British airmen have been killed in the six months of blockade flying.

Launched in haste, confusion and without money, only the bad weather remains today as a reminder of the first hectic days of the air lift.

In six months, the air lift has developed into a smoothly-running organization whose precision, both in the air and on the ground, has proved faultless.

Today, more than 15,000 American and 1,000 British planes are actively engaged in some phase of the operation, whether flying the cargo, maintaining ground supply lines, or servicing equipment needed to make the air lift tick over.

PECULIAR BEETLE
The divine beetle is an aquatic, predaceous beetle. It is flat, oval, and when not disturbed, hangs head downward in the water, with only the tip of the abdomen touching the surface.

A POPULAR MATERIAL
In the 82 years since its first successful commercial production rayon has grown so rapidly that its world consumption exceeds that of wool. It is 13 times greater than silk, and is surpassed only by cotton.

HEALTH Efforts To Control Cancer Co-ordinated

During the past year in Canada, great progress has been made in the co-ordination of a previously divided effort aimed towards the control of cancer, stated in a National Health Week message from the Canadian Cancer Society. In May of 1948, the federal government announced that \$2,000,000 per year of the total Health Grant would be devoted to increasing the diagnostic and treatment facilities for cancer in the various provinces, provided the provinces would meet this expenditure on a matching basis. In other words, \$7,000,000 per year is now potentially available for the diagnosis and treatment of cancer across Canada.

In June of the same year the two nationally recognized voluntary cancer organizations became affiliated for the purpose of co-ordinating their own phases of the cancer program.

One of these organizations, the National Cancer Institute of Canada, supports an expanded program of cancer research in Canadian universities, the co-ordinating of which is its primary concern. Furthermore, a program of Fellowship for cancer research training has also been established.

The other organization, the Canadian Cancer Society, has accepted responsibility for lay education and welfare services in the field of cancer, and is, to a large degree, responsible for the raising of funds for the work of the National Cancer Institute.

The Canadian Cancer Society, through its provincial branches, is responsible for lay education. Its program is based on the belief that "Early Cancer is Curable in the Majority Of Cases."

Its efforts are directed towards early diagnosis and treatment as the only means of reducing cancer mortality at the present time. Welfare services of the Society include the provision of cancer dressings, transportation for cancer patients and loan closets, as well as such other necessary services as may not be available through other agencies.

The program of the National Cancer Institute and the Canadian Cancer Society are complementary to the diagnostic and treatment services of the provincial governments.

As a result of this program of cancer control developed, the service through national voluntary agencies will expand and will require increasing public support.

Plan Your Warm Weather Wardrobe Ahead

It is always a good idea to plan your wardrobe in advance and here are two outfits that make you dream of the good old summer days. You can even take them with you if you are planning a trip to southern resorts this year. At left is a dressmaker cotton collar give it an individual look. For the inside who likes to stay or cycle, or the knee-buttoned push button guaranteed to stay true Central Park Canadian.

place, even your sandwiches are going to have a hard time overcoming the heat. In a space of this kind is recognized. And nothing can infect drama so effectively as a bold, colorful pattern in the right colors to put the maximum of light and personality into your home.

Look of space, though a decorating problem, need in no way detract from the charm of your finished hall. If you recognize its needs and supply them.

The greater part of its need is a lack of depth and spaciousness. Since there is neither space nor occasion in the little hall for those odd pieces of furniture, interesting drapery treatments, and sundry knick-knacks with which you can make the average room warm and cheerful, you must depend almost entirely for your effect upon the wallpaper.

In selecting this paper, don't be timid. The days when small wall space had to be covered with chevron, nondescript designs or plain paper are gone. Now, the need for drama in a space of this kind is recognized. And nothing can infect drama so effectively as a bold, colorful pattern in the right colors to put the maximum of light and personality into your home.

Scene wallpapers in the small hall are most attractive and serve a definite purpose. These papers give an impression of distance and perspective. In turn, achieve an illusion of depth and spaciousness. The result you most need in your hall. Play colors and patterns can also be most effective in the hall of an informal home. Choose paper with a background in one of the "receding" colors, such as pale green, pale blue, pale yellow, or pale pink.

Designs with bold, interesting signs to give life to this welcoming place in your home. Or, if you prefer, a pattern that is sufficiently simple to see that it is—some of the more sophisticated papers with rich, deep patterns can add dignity and drama to the routine of taking off galoshes.

AN ANCIENT RAZOR
Razors have been used for at least 8,000 years by the man and woman of the world. In the possession of a collector is a razor used by Queen Hat-Shep, of Egypt, in 1500 B.C. and it is said to be still almost sharp enough to shave with.

The world's first art was drilled in 1859.

During the winter months when there are not quite so busy on the farm is a good time to remedy that hazard which nearly causes an accident back to the summer. Perhaps it was a faulty trap-door, or perhaps a broken beam, or perhaps a loose board in the barn, or perhaps a loose board in the house on the veranda. Whatever it was, if it isn't fixed there may be a real accident this winter.

It is estimated that there were 37,200 non-fatal accidents on Canadian farms in 1947, and 30,000 of these were to men. During the same year in the United States 150,000 farm people were killed accidentally and 1,800,000 were involved in non-fatal injuries involving lost time.

Many of these accidents should not have occurred. For instance, on Canadian farms the most frequent accident is from falls, and the most frequent cause is the relaxation of trap-doors and inadequately protected stairs. Hand railings on open stairs, and a railing to guard every stairway opening and trap-door, will prevent a great many injuries.

New than patching old worn steps on stairways may cost a little more than patching old worn steps on stairways, but it is a lot less than a doctor's bill and time lost when a broken beam is mending.

Patented safety stairs are a series of steps that only too often do not exist. They are a railing to guard every stairway opening and trap-door, and stairs in a house are a lot safer when kept free from hay and straw.

A cause of some farm accidents which is often overlooked is the use of too loose clothing. Loose clothing on a wet day can cause a slip, or if it is windy can blow into engines or machinery, or if it is in operation, it reduces the risk of a fall. If a belt is worn with such garments.

How Woman Got Idea To Start Dog-Racing
OTTAWA.—The word "mush" never belonged in a dog driver's vocabulary. Mrs. Nanzen says Mrs. Nanzen, one of the world's few women dog racers.

Mrs. Nanzen gained her reputation in 1931 when at the last International Dog Derby was held here. She came third in a last and experienced field.

Mrs. Nanzen first became interested in dog-racing in 1927 when she lived in Poland Springs, Me.

"I got the idea while I was pushing youngsters around in a babybuggy," she said. "Wouldn't it be easier for me to take them out in a small wheelbarrow than to have a team of whiffs?"

Finally Mrs. Nanzen "picked up a few scrub dogs" and made herself a team of five dogs in five days to pull the kids around."

PROVED HE WAS RIGHT
TAMPA, Fla.—Melvin Jones, blind since 1931, has successfully built a house for himself and his sightless wife. The task took him 10 years and during that time a sign in the front yard said: "It can be done—even by a blind man."

The Statue of Liberty is a hefty lady. Weight 220 tons, height 400-000 pounds.

Decoratively SPEAKING

ON THE SIDE
Q. wily, wily. But how he lunny a little time there. It must be always in the way it is new. And fades away like morning dew. Had I wild, I before I knew. That love had been in it to me. I had locked my heart in a case of gold and silver. I pinned it with a key of love. —Anon.

How about your secretary, mister? Is she on the alert? Has she the first of the year has she put down the date as "1949" rather than 1947? Apparently they want to be considered our allies now. This brings to mind the immortal advice of "Big Tim" Sullivan, namely: "If you can't beat 'em, join 'em."

SIDELIGHTS
The sales of television sets for 1948 was 366 per cent above 1947. Daphne is a nice name. It is strange more parents do not bestow it upon their female offspring.

SO THEY SAY
Women born under Cancer (June 21 to July 22) are inclined to marry again very soon after the passing of a first husband. Virgo, Aug. 23-Sept. 22, people usually live to a ripe old age, especially the females. Sagittarius, Nov. 23-Dec. 21, men are inclined to rush thoughtlessly into a love affair and to become quickly involved to the extent of an engagement to be married. That's why Sagittarians break more engagements than men born under any other sign. Aquarius, Jan. 20-Feb. 18, men are usually fathers, grammar school teachers and baby sitters. They have unusual talents in teaching children and playing bagpipers.

FATHERS CLUB
One of the most successful clubs in London is the Fathers club, which holds regular meetings at the Rarven Hotel. The club is open to men to join this highly interesting organization are fathers and expectant fathers. It meets on the first Monday of each month at the Queen Charlotte maternity hospital. When the blessed event of an expectant father is in place the floor with him in the hospital waiting room while he is waiting for the nurse's announcement. Afterward the new father is honored at a special party at the Rarven pub. Of course, at all times the young father has the advice of the experienced fathers. A father's club is a great idea. Why not start one in your neighborhood?

STRANGE COMPANIONS
Ever hear of a cat having a canary for a pal? I have. In fact I had a snapshot picture of this cat and canary sitting together. Cats are considered aloof and cold but it appears they have a great capacity for friendship. Not only do I know of a cat and canary but I also know of a cat and a canary who is fond of the companionship of fish. That is the cat at the aquarium of the London Zoo. Not only does the cat have a great affection toward fish but he absolutely will not eat any kind of fish. I have heard of a dog who ate the slugs and snails but not a must, but that's the first cat I ever heard of being adverse to fish as a food.

DANCING HUSBANDS
Only three per cent of U.S. husbands are married with their wives. Only one-half of one per cent, married men in that country can be classified as good dancers. Such is the case in the United States. It is very rare that any husbands should have a good dancing partner. The most common of the tepid character. How about you, Mister? Does your matrimonial companion consider you a good dancer? If not, it is time to get a move on. I met a "willing" dancer but she believes there is considerable room for improvement in my footwork on dance floor. I am a good dancer, but I am not a dancing social. The dancing question is the cause of domestic discussion in some families. One of the slugs and snails but not a must, but that's the first cat I ever heard of being adverse to fish as a food.

STAMP CORNER
Representative of the stamps of the South Pacific island colonies and protectorates of the British Empire, the Solomon Islands, Cook Islands featuring Captain Cook, and Tokelau Islands, and (lower, left to right) stamps of the British Islands, Brunei, and Ellice Islands and Tonga featuring Queen Salote.

In the South Pacific there are numerous stamp issuing British colonies, which in recent years have issued pictorial stamps. Through these stamps collectors are able to learn something about the people and scenery of these island colonies.

Included in the colonies are the Fiji Islands, Samoa, British Solomon Islands, New Guinea, British Isles, Cook Islands, Brunei, New Hebrides, Tonga, and Gilbert and Ellice Islands. Last year two new stamp issuing colonies were created, Norfolk Island off Australia, and Tokelau Island off New Zealand.

Unlike most British colonial stamps, stamps of most of these islands have been pictorial issues. Some of the earlier issues have featured only the current British monarch, but postal authorities early felt that these colonies would be more popular with stamp collectors if the stamps were more attractive.

The stamps of the Fiji Islands are a good example of the South Pacific island stamps. The Fiji administration began issuing stamps in 1910, with a type set stamp printed locally at Suva. The capital of Fiji. These are the most valuable of the royal stamps. The following year the royal cipher and crown were featured on stamps, and in 1918 Queen Victoria's cipher and crown were used on the stamps. While postage stamps in 1912, standard British colonial silver jubilee and coronation sets appeared for the colony in 1928, the stamps were issued.

WINTER WONDERLAND—The magic hand of winter has made a wonderland of the famous Bois de Boulogne in Paris. A frosty hand made this of the famous waterfall. Jack Frost has also gone to work on Niagara Falls. Frozen spray has made quaint formations and a heavy snowfall has given additional beauty to the surroundings, giving tourists and sightseers plenty to marvel at.—S.N.S. photo.

D.P. GIRLS COMPLAIN OF MISTREATMENT (S.N.S. photo)
Ligita Verna, (left), and Argalis Blinda, D.P. girls working in Montreal mental hospital, says patients have been beating them but they can't get better job because of contract under which they came to Canada.

HOP BY CUB PLANE—George Truman, of Washington, D.C., Saskatchewan-born around the world flier, is shown at the controls of the Piper club plane previous to a non-stop flight from Toronto, Ont., to Miami, Fla. Truman, 40-year-old ex-barnstormer, flew around the world in a 100-h.p. Piper club super cruiser a year ago. Extra gas tanks added to the stock plane gives it a range of nearly 2,500 miles. Flying distance from Toronto to Miami is about 1,200 miles.—S.N.S. photo.

WORLD'S YOUNGEST MARRYING PARSON AT PLAY—The world's youngest marrying parson, four-year-old Marjorie Gortner, has returned to his 2nd fire engine and drums after preaching to his first big city revival meeting in famed Philharmonic auditorium, Los Angeles, Calif. A crowd of nearly 3,000 paid polite attention as the curly-haired boy evangelist in his shrill voice exhorted them to get religion. An occasional religious fervor from the predominantly church-going audience. It was Marjorie's first appearance on a church platform since he married a young couple in Long Beach recently. But the little preacher made no mention of the marriage that set off a national controversy over the propriety of having a child perform marriage rites. Above Marjorie shares a toy with his two-year-old brother, Verne.—S.N.S. photo.

OLD BROOM VS. SCOT'S BRUSH—That old kitchen broom, as important to Canadian curlers as a steady right arm, is getting a real talking about since the visit of the touring Scots. The tweedy, pipe-smoking Scots on a month's tour of North American curling centers and already well ahead of the Canadian opponents they've played, say politely they wouldn't touch a Canadian broom with one of their live-foot brushes. The result is something of a controversy among members of the mild-mannered curling brotherhood. The Scots declare their live brushes "polish the ice nicely in front of a stone" and are specially made for curling.—S.N.S. photo.

RARE DISEASE SNAPS HER BONES—A seemingly healthy, robust, fair-haired little Hamilton girl quietly observed her second birthday Jan. 4, and nothing happened. Her parents were thankful. They know she may break a leg, an arm or even her skull at any moment, because she isn't just like any ordinary child. "She's more like a china doll," said Mrs. Edgar Harne, of her only child, believed to be only the second person in Canada to be afflicted with osteogenesis imperfecta congenitalis, which in a layman's language means imperfect formation or growth of bone in a newborn baby. Above Sandra is pictured with a toy.—S.N.S. photo.

COURT STAB AIDS IN ARREST OF GAMBLERS—David Shapiro, (left), co-captain of George Washington basketball team, is congratulated by District Attorney Hogan for his part in entrapment of four gamblers accused of attempting to fix game with Manhattan college in Madison Square Garden, New York. Shapiro, of Brooklyn, N.Y., winner of four battle stars in the European war theatre, is the hero of dramatic four-month-long investigation during which he had numerous meetings with the plotters while working with the police toward their entrapment. The four men, Jack Levy, Joseph Aronowitz, William Rivlin and Philip Klein, were arrested just before start of the game and were booked on two charges, attempted bribery in amateur or professional sports and conspiracy to bribe. The George Washington quintet, with Shapiro on the court, defeated Manhattan college, 71 to 63.—S.N.S. photo.

FIVE FIRE DEPARTMENTS STEEM INFERNO—Fanned by a strong northwest wind, a spectacular fire destroyed a business block of stores and apartments at Sunderland, Ont., and made four families of 11 people homeless before being brought under control by volunteer firemen and bucket brigades. The blaze raged out of control for three hours and threatened the entire community, which is situated 20 miles west of Lindsay, Ont. Five stores, the town post-office, a grocery warehouse, several apartments, a poolroom and an egg grading station were destroyed. Only piece of fire-fighting equipment saved by Sunderland was this antiquated chemical tank trailer shown with Gus Doyle, village constable, who is also volunteer fireman.—S.N.S. photo.

VENEZUELA'S DEPOSED PRESIDENT ARRIVES IN FLORIDA—Recently deposed Venezuelan president Romulo Gallegos is shown with his wife, daughter Sonia, 10, and son Alexis, 11, as they arrived at Miami, Fla. from Cuba. Gallegos has been in exile in that country for the past six weeks, since his government was overthrown by a military junta. He says he is still president and refuses to resign. After two months in the United States, he will proceed either to Mexico or Cuba.—S.N.S. photo.

DUTCH AMBASSADOR TO CANADA ARRIVES—Jan Van Royen, Netherlands representative on the United Nations security council, who is shown shortly after he arrived in New York from Amsterdam. Mr. Van Royen, who is also his country's ambassador to Canada, had the job of talking for his country in the controversy over the Dutch "police action" in Indonesia.—S.N.S. photo.

FINALLY HAS CAST BUT THREE DAYS LOST—Fearful of breaking a 10-year attendance record, Paul Yessier, shown here, of the High School of Commerce, Ottawa, attending school for two months after breaking his back playing football last fall. Finally the pain became more than he could stand and he had to miss three days having cast put on his injured back.—S.N.S. photo.

BOY RESCUES TWO CHUMS FROM RIVER—Eleven-year-old Alex Coubrough of Bradford, Ont., indicates spot where he pulled Mark Bowden, four, and Virginia Ellis, six, shown inside, from the icy Grand river after they went through melting ice. Alex plunged in fully clothed when he found children struggling in the water.—S.N.S. photo.

EAGER TO IMPROVE, SKIERS ATTEND SCHOOL—Keen skiers who yearned to be instructors went through their paces at Collingwood, Ont., in a seven-day training session. An estimated 68 pupils were enrolled in the class. The graduates will become either professional or amateur instructors. Tumbles in the snow are all part of the fun of skiing and Jo Anne Coulton of Toronto found that even the best skiers occasionally wind up in the fluffy stuff. Control of skis in every type of snow is one of the lessons learned at the school. (S.N.S. photo)

NEW FORESTS FROM THE SKY

Helicopters Sow Vast Area With Tree Seed

Check-up—Seed falling on this cheesecloth square is counted to check distribution for the entire area.

Loading—Seed hoppers on helicopters are brain filled before take-off on planting flight.

By Andrew R. Boone
(Written Specially for CENTRAL Canadian and this Newspaper)
MIST, Ore.—Pilot Tom Hall lifted his helicopter from a cow-pasture near this lumber town. Laden with 500 pounds of cedar, fir, spruce and hemlock seed, the windmill snatched awkwardly toward the mountains.
For two hours, the "copter" heaved seeds from a pair of hoppers over canyons and slopes. Then Pilot Hall turned his whirling blades back toward Mist, having planted a broad-acre area of the Crown-Zellerbach corporation's Columbia tree farm.
For good measure, the pilot then took off once more to plaster the acres in the nearby Clatsop tree

Gay gloves for boys and girls. Three colors! Make a different color combination for each child. Two needles—easy to use.
Kids! Make a different color combination for each child. Two needles—easy to use.
Our improved pattern—visual with easy-to-use charts and photos, and complete directions—makes needle work easy.
To obtain this pattern send twenty-five cents in cash (stamps cannot be accepted) to Housh, Inc., Dept. 100, Winnipeg, Newsworld, 1000, 115 McMillan Avenue E., Winnipeg, Man. Be sure to write plainly your Name, Address and Patent Number.

farm. More than 20,000,000 seeds, obtained from the heavens onto 1,600 virgin acres during these two brief flights!
Thanks to the motorized hummingbird and other reclamation tools, many thousands of forest land areas are being brought toward production of new trees. Federal, state and privately employed foresters leave nothing to chance in a new program of reforestation.
As Hall flew, a rotary agitator kept the seeds flowing into the explosion tube. Vibrations of piano wires, picked up by a tuning fork, were carried to the pilot's head phones. When the tune faded, he knew the machinery was jammed up, or a hopper was empty.
Below, several acres of crown cloth, each exactly 17,000-acre in size, caught samples of the falling seed. Simple multiplication revealed how many seeds on each acre.
Paul Burnay would wipe a giant grinning face across his eyes in disbelief could he see the going-on-inches to prevent "timber" starvation in Washington, Oregon and California.

Helping out the flying windmills, crews in the northwest are dunking seedling trees into wet solutions that keep them living in dry earth until the rains come; others are jabbing special planting tools into the earth. These make holes and protect roots against damage in a single operation.
Crews operating powered saws are felling burned snags by thousands, making way for a new plantings; and others are clearing away overgrown roads behind wartime flame throwers, opening the forests for the fire fighters.
Oregon's timber slopes have become in the last year the world's biggest forest research laboratory. In a mammoth outdoor workshop, seasoned from the few-watched coast to the high interior mountains, private industry and public foresters have joined forces.

They aim to learn how to cut timber more efficiently, and how to reproduce, grow trees faster. They not only will get more out of the present crop, they will leave other crops for future generations.
One of the most dramatic undertakings has been started in the 300,000-acre Tillamook burn. Three times a roaring inferno has gutted this valuable area. How to cure the ailing and pour a considerable problem. The area is now growing fast. Spruce was cleared out this year.
Within two years, seedlings will be thriving throughout the area. "In 10 to 30 years," says Rudy Kallender, "the area will be a forest again, with the big job done, trees will be bearing cones and producing seed."

After that, nature will start scattering new seed, and the forest becomes permanent.
Like humans, trees need breathing room to regain their full growth. Many, now 40 years old and normally with trunks six inches in diameter, are so crowded they stand on spindly two-inch legs.
Bulldozers and power saws are being thrown into these stands in a big thinning operation. Annual checks will reveal whether this stunted timber can regain its vigor.
One important program in this widespread task involves determining of the best ways to cut pine. It is hoped a method will be evolved to bring about regeneration and quality production.
Dense stands of Douglas, larch and white fir may be removed from steep slopes of mountains, provided some way can be found to effect their removal. In their place would go lodgepole pine. Why? Because forestry experts believe pine, natural to the country, would produce more abundant timber yields.
Another study will start soon to learn why Douglas fir decays in the forest so rapidly, and what can be done to stem the decay and how to utilize the decayed wood.
The men are chasing worms, too, especially the spruce budworm. Already a million acres of Douglas fir is infested with this little marauder. Its threat to additional stands of timber is serious. Spraying operations from the air, if they being promised, are believed to hold promise of fruitful results.
Biggest enemy of all is fire. Helicopters and airplanes have the job of carrying flame-jumpers, tools and water, to halt incipient conflagrations. If the fire demon gets away, they will come back again, bearing more seed that the sickened soil may be put to work again.

HAS SCOTCH NAME BUT FEW SCOTCH SETTLEMENTS
ARLAK, Sask.—This place is supposed to have derived its name from the Island of Arran in the Fifth of Clyde. Despite its name the district around Arran is not mainly settled by Scotch people. A great many Doukhobers settled there years ago. It is not far from Maida Lake, one of the largest water spots of the province, near Kamloops.
The Scotch name of the place is "Smile of the Week."

SETTLED IT
"Jim's a confirmed bachelor, is he?"
"Yes is now. He sent his picture to Lonely Hearts Club and they told it back with a note saying: 'We're not that lonely.'"

Malnutrition Evident

Canada's Northern Indians Have Abandoned Native Eating Habits

OTTAWA. — Canada's northern Indians have lost the art of eating. Not that they don't eat. They do, but not well. They have abandoned the native eating habits of their forefathers and adopted a semi-civilized, semi-native diet which lacks essential food values, brings them to malnutrition and leaves them prey to tuberculosis and a host of other diseases.

The white man, who unintentionally is responsible for the Indian's changed eating habits, now is trying to salvage the red man by directing him towards proper food channels.
Dr. P. E. Moore, director of the Indian Health Services for the Federal Health Department, is heading a program which has two main objectives: 1. Teaching the Indian what he should eat for an adequate diet; 2. Bringing wholesome foods containing protective components closer to his hand.
The program is directed mainly at the 50,000 Indians leading a nomadic existence as hunters in Canada's northern lands. It has little to do with the 80,000 reserve Indians who live near populated centres and have access to proper foods.

Dr. Moore explained the Indian's problem in one simple sentence: "The Indian used to hunt for food and now he hunts for fat. That, he said, was the basic factor."
Interviewed in his Ottawa office, he explained how the old-time Indian obtained essential vitamins and minerals from the game and soil about him, while the present-day Indian gets little food value no matter how much he feeds.
The old-time Indian, he said, would catch a fish or kill an animal and eat it virtually whole, thus supplementing the red meat with a vitamin and mineral-rich diet.
The Indian, he said, today, adopting white man's standards, eats only the red meat and discards the rest. To

this he adds foods purchased at the trading post with his furs — flour, sugar, lard, tea, which by themselves are lacking in many food essentials.

With the loss of his native eating habits, the Indian has lost, too, the physical stature of his forefathers.
In addition, the Indian has acquired characteristics of shiftness, indolence, improvidence and inertia, now regarded as hereditary traits of his race, but actually the results of years of inadequate diet. He is weak and less able to resist infection.
Dr. Moore said the department is trying to get the Indian to drink milk, either powdered or evaporated, to supply calcium which his forefathers obtained by boiling animal bones until they softened and then chewing them.

The Indian also is being urged to establish garden plots and grow fresh vegetables such as potatoes, turnips and carrots.

Dr. Moore said the department began its studies and the accompanying diet-improving program in 1940. Improvement already has been noted in the eating habits of the Indians and, as a consequence, in their general health.

One major factor, he said, was family allowances. Northern Indians receive no cash for family allowances but rather are allowed a food credit at the trading post. Through the vitamin scheme, they now obtain prepared baby foods, powdered and evaporated milk and nutritious products for their children.

"Ma" Of Edmonton Retires After Twenty Years At Newstand

EDMONTON.—Mrs. Annie Ruddy, 74-year-old mother of 11 children, has retired from the "newspaper business."
Mrs. Ruddy, a familiar figure in downtown Edmonton for nearly 20 years and one of Canada's oldest newspaper vendors, has retired from the busy thoroughfare to the quiet of her home.
Decision of Mrs. Ruddy to give up selling papers did not arise from any dislike of the occupation. On the contrary, she enjoyed the outdoors and the thrill of meeting and exchanging words with customers.
"I greeted them all with a smile and a joke," said Mrs. Ruddy who still has nine of her children living. "It made them feel good."

It was "because my legs were beginning to bother me," that Mrs. Ruddy decided to retire. But she leaves her husband Pat to carry on as he has sold papers at his new stand, also in downtown Edmonton, for more than 10 years. Mr. Ruddy is a veteran of the First World War. Mrs. Ruddy was known to one and all as "Ma." Although "Grandma" would have been more appropriate for a 74-year-old grandmother and eight great-grandchildren.

Born in Chelms, Minn., Mrs. Ruddy has lived in Edmonton since 1918 but she always had time for her household and her hobbies—knitting and embroidery. She still keeps about half-a-dozen cats as pets.
"I made a fair living selling papers and I found it healthy," Mrs. Ruddy says. "There's nothing like that early morning air which so many people miss."

LARGEST FISH EVER LANDED

The largest fish ever landed in North America was delivered by a whale shark, found grounded near the quarantine station at the mouth of Cape Fear river in June, 1934. The shark's weight was estimated at four tons.

SEAMAN SAVES LIVES OF TWO SHIPMATES

ABLE Seaman Bill Bryce of Toronto was credited with saving two of his shipmates from drowning when the Canadian freighter Cumberland County was caught in a fierce North Atlantic gale. Bryce said a big wave "about half the height of the mast" reared over the freighter's side, during a north Atlantic gale which reached a peak of intensity 400 miles off Maine Head, County Donegal. Bryce and two other Canadians, David White, messman from Cape Breton Island, and Don Harriet of Fruitvale, B.C., were swept, like toys toward the ship's rail. "We lay on our stomachs clinging to anything we could get hold of," Bryce said. "We were all in danger of being swept overboard. White caught hold of my legs and Harriet managed to grab one of my arms. With the other arm I held on to a hatch." The 10,000-ton freighter was en route to Philadelphia from Narvik, Norway, with 6,000 tons of iron ore.—S.N.S. photo.

Canadian Army To Have New Summer Dress

OTTAWA.—Those unpopular khaki drill uniforms, standard summer dress for years in the Canadian army, are a thing of the past.
New summer uniforms and neat garrison raincoats will be issued to Canadian soldiers around May 1, the army announced recently.

Smart worried looking out uniforms will replace the khaki drill uniforms by enlisted ranks and famed for their inability to keep a press for more than five minutes in hot weather.

The new uniforms will be standard for all ranks, commissioned and otherwise.

The officers, however, will be permitted to wait until their present campaign uniforms wear out before changing over.

As in the past, the uniforms will be issued to enlisted men; the officers will pay.

Helpful Hints

To keep a bathnet from sticking while it is stored, sprinkle it liberally with talcum powder, and stuff it with paper into the corners.
If crumpled sheets or your table linen, immediately after the meal hold the stained parts under boiling water. Let the water run over the stains until all the color is gone.
To remove nail polish from a cotton material, sponge the stain with methyl alcohol. Then apply a drop of banana oil to soften the polish, then use a dry cleaning soap.

When candles drip on your table cloth, scrape off as much wax as possible with a dull knife, then, using a warm iron, press the stain between cleaning tissues or paper towels, changing as they become soiled. Then sponge with a grease solvent. If a color stain remains, sponge with a solution of one cup denatured alcohol and two cups water.

When candles drip on your table cloth, scrape off as much wax as possible with a dull knife, then, using a warm iron, press the stain between cleaning tissues or paper towels, changing as they become soiled. Then sponge with a grease solvent. If a color stain remains, sponge with a solution of one cup denatured alcohol and two cups water.

GEMS OF THOUGHT

NEIGHBORHOODS
Thou shalt love thy neighbour as thyself.—Matthew 19:19.

One person I have to make good; myself. But my duty to my neighbor is much more nearly expressed by saying that I have to make him happy.—I may.—Robert Louis Stevenson.

The rich in spirit help the poor in one grand brotherhood, all having the same Principle, or Father, and blessed is that man who sees his brother's need and supplies it, seeking his own in another's good.—Mary Baker Eddy.

It is one of the most beautiful compensations of this life that no man can sincerely try to help another without helping himself.

Reach me to lose my selfish need, and glory in the larger deed, reach smooth the road and lights the day.

For all who chance to come my way.—Edgar A. Guest.

Kind looks, kind words, kind acts, and warm handshakes—these are security measures. For when men are in trouble and are fighting: their unseen battles.—John Hall.

MOVIE STARS CAUSE HOLLYWOOD MEN HEADACHES—Facing costs in Hollywood is blonde Lila Lore, in whose tiny cottage at Laurel Canyon, Robert Mitchum, actor; Robin Ford, realtor; Vickie Evans, dancer, and Miss Lenda were picked up in a raid. They are charged with narcotics violation. When arrested Bob Mitchum admitted using marijuana "since I was a kid." The trial of the Hollywood celebrities is attracting widespread interest. The romance of Lila Lore and Prince Ali Khan has also aroused worldwide interest.—S.N.S. photo.

OUR COMPLETE SHORT STORY—

NO END TO LOVE

MARTHA settled herself in the comfortable chair and glanced around the attractive room appreciatively. She leaned across the table and spoke softly. "This is a lovely place, Jim. Your surprise is wonderful!" Jim beamed. "Nothing is too good for you, Martha, even after twenty-five years."

Martha touched his hand gently. "You've always said that, haven't you. And it has been a wonderful twenty-five years." Jim patted her hand and cleared his throat. "Wed better order."

The mellow strains of a Strauss waltz drifted over the room and Martha's foot tapped the floor. Jim grinned. "I know the signs, let's dance."

Martha protested feebly. "But your foot, darling, it'll get cold!" Jim stood up. "Many's the time we've led good foot get cold, just as we could dance together. This is no exception. Come on, let's dance!" They swung into the crowd and Martha thought, it could be thirty years ago when they were young and foolish. She sighed a little. "Breadth, let's dance."

"See," she said triumphantly. "I told you our food would get cold!" Jim nodded. "Of course, but after all these years, I'm used to it." He smiled at her, and she smiled back contentedly. She watched the dancing people, and she smiled back contentedly. She watched the dancing people, and she smiled back contentedly.

"There," Martha pointed. "The tall dark-haired young man and the little girl. There, right in front of the piano now."

"No, silly, but I've been watching them. I suppose you'll say I'm crazy, but they remind me of us when we were young. They have danced every dance, so their food must be getting cold, too."

Jim laughed. "Such deduction!" he teased. But his eyes were interested, and he watched them too.

Martha squeezed her hand. "Look, Jim, see how he holds her. Every once in a while he moves away to look at her. They don't seem to be aware of anything or anyone, but each other. We were that way too, remember?" Jim nodded. "Yes, of course I remember!" They sat.

DOES INDIGESTION WALLOP YOU BELOW THE BELT?

Help Your Digestion! For The Cause! That's How You Make It! In fact, the only way to get rid of indigestion is to use the stomach and the bowels.

Martha raised her fingers to her grey hair. "Oh, Jim, I can't remember how I looked when I was young, and you used to say, 'Hello, Beautiful!'"

Jim took her hand. "You're still beautiful, you always will be." He pressed her hand gently, and she held on to his fingers. "The music began again and Martha said, 'Look, there they are again.' The young couple swung into a rumba and finished, laughing and breathless. Martha's tone was wistful. "They're having such fun!"

"We did too, remember?" Jim asked. Martha smiled. You know I do," she turned to watch the couple on the floor again. The man pulled the girl close to him and she leaned her head against his chin. He bent and said something to her.

"It's his telling her he loves her," Martha observed. Jim threw back his head and laughed aloud. "Oh Martha, you're still an incurable romantic!"

"Is that so?" she replied tartly. "Well, you're a smugger sentimental, and you know it!" They laughed together.

Jim pulled out his watch. "Time to go," he said. "Yes, I know," Martha replied. She glanced again at the couple on the floor.

"This has been a perfect evening," Jim said, somewhat, seeing that young couple out there has made it even more perfect. It makes me think of us, all over again!" She laughed. "You're still an incurable romantic!"

"Is that so?" she replied tartly. "Well, you're a smugger sentimental, and you know it!" They laughed together.

Jim pulled out his watch. "Time to go," he said. "Yes, I know," Martha replied. She glanced again at the couple on the floor.

"There's No Past And No Future, There's Only Now."

By LILA LENNON

"Time to go, darling," he said quietly.

"Yes, I know," she replied. He sighed. "Where does the time go?"

The girl turned her head. Suddenly tears wet her eyes. "I don't know. I just know that when I'm with you that time seems to have flown. There's only now and you."

He reached over and pulled her arm through his arm. They sat entwined tightly, and they sat silently. She sighed, and shook her head a little. "I'm like Cinderella, the clock strikes, and back I go."

"Yes," he said quietly. "You go back to your home and I go back to my life, and no future for us together, ever."

"Don't," he begged. She looked at him and said softly, "I love you, darling." He leaned over and kissed her gently.

She picked up her bag and gloves and arm in arm they walked through the doorway. Behind them the velvet curtains swung together with a silent finality.

Dr. Chase's Ointment

CANADA IS VICTIM OF TROPIC-TWILY WEATHER — Tropic-turvy weather across Canada, varying from unseasonable "heat waves" to blizzards, is record snow left room for this normal winter scene at Midland, Ont., six miles where Pete Patterson does 90 feet to win the ski club's competition. In Toronto, golfers took advantage of the balmy weather and played some golf, but in Vancouver, where there is six inches of snow, the skisuits got out their winter clothing. — S.N.S. photo

Western Briefs

ANTI-EAT WAR

WINKLER, Man.—Due to a serious infestation of rats, the Winkler chamber of commerce has urged the village council to provide every householder with poison, and instructions to use same, to wage an all-out battle against these rodents. A poison-baiting to cats and dogs, have been used in this anti-rat campaign. It is felt that such a campaign will be most effective during the winter months when the rats would not be able to travel far.

EXERCISING HER RIGHTS

CONSORT, Alta.—Here's a 93-year-old woman who believes in exercising her rights. Mrs. Elizabeth Poynter has never missed an opportunity to cast her vote in any election in which her name appeared on the voters' list.

CAN'T DO SUCH THINGS

HERBERT.—Plans to go ahead with the construction of a new rink at Herbert were discussed at the Herbert chamber of commerce meeting. President A. J. Loopy, stressed the point that although it is still winter, an order for a contract of cement should be placed at an early date to insure construction of the rink this coming summer.

PHOTOGRAPHERS' PRESIDENT

WINNIPEG.—Richard Cannon of Winnipeg, was elected president of the Western Canada Photographers' association at the annual meeting here succeeding C. J. Smith of Brandon.

\$55,000,000 GRANTED TO BUY CANADIAN WHEAT

WASHINGTON.—One of the largest single Marshall plan aid grants—\$55,440,000 to the United Kingdom to purchase Canadian wheat—was announced by the Economic Co-operation Administration.

SHOULD BE CORRECTED

After buying a set of household furniture from a department store which advertised "Buy now, pay as you earn," a customer in Philadelphia lost his job, quit his installation, pointed out that he wasn't earning and so didn't have to pay his case in court.

Alberta Produces Most Beet Sugar

LETHBRIDGE.—More than half the beet sugar produced in Canada during 1948 came from southern Alberta. It was learned.

Beet crops grown in the Lethbridge area yielded 91,275,700 pounds of sugar out of a total of 375,714,000 pounds produced in the Dominion. Second to Alberta, Ontario produced 50,000,000 pounds of beet sugar; Quebec, 20,500,000 and Quebec, 7,938,000.

NEW RELIEF! WHEN COLDS CAUSE

Croupy Coughs

VAPOR'S STEAM

Brings relief with every breath!

Mother, you know what comforting relief you get when you rub on Vicks VapoRub!

Now, whenever your child wakes up in the night coughing with a croupy cough of a cold, here's a special way to use Vicks VapoRub. It's VapoRub Steam!

Put a good spoonful of Vicks VapoRub in a bowl of boiling water, and let the steam rise. Medicated vapors penetrate deep into the congested upper bronchial tubes and bring relief to every breath!
